

PRESIDENT'S LETTER  
JANUARY 18, 2022

Hello Fellow Beekeepers,

At the last meeting of the Tri-State Beekeepers, our member Chris Druschel offered to present a program on Wilderness First Aid with an emphasis on non-prescription treatment of bee stings, and to add to the event by including a course leading to a CPR certification. That evening, many of you expressed an enthusiastic desire to attend. On January 1 we opened registration for the event, scheduled for Saturday, February 19. Information regarding the event is found on our website at <https://www.tristatebeekeepers.com/wilderness-first-aid-and-cpr-course>, accompanied with the registration format. Unfortunately to date, the response has been very limited. Without a sufficient number of participants, we will be unable to offer the event. Maybe you have been procrastinating and delaying registering. Maybe you were unaware of the program. Maybe you don't see a need to attend for as a beekeeper you are never stung. Regardless of your reason for failing to act by now, we ask you to consider taking part in this club event and the generosity on the part of Chris and register at this time. Thank you for your consideration and we hope to see an overwhelming response as you are now motivated to stand up and be counted.

Steve
